

UI & MODEL SPECIFICATION SHEET

Build It in English · Day 2
Hoja de especificación de interfaz y modelo · Día 2

Field	Value
Student(s) / Estudiante(s)	Cristian Antonio Castro Quiroa, Jose Daniel Aguiluz Valladarez, Estiven Ariel Platero García, Moises Isai Cornelio Hernandez
Project / Proyecto	Field Kit — Technician Service Log
Environment / Entorno	C# · .NET MAUI
Accent colour / Color de acento	#22D3EE (cyan)
Fonts / Tipografías	Segoe UI / Inter for text · JetBrains Mono for numbers
Date / Fecha	02/09/2026

Cantón Lourdes, Colón, La Libertad, El Salvador

Team members / Integrantes

No.	Full name / Nombre completo
16	Jose Daniel Aguiluz Valladarez
23	Cristian Antonio Castro Quiroa
24	Moises Isaí Cornelio Hernandez
31	Estiven Ariel Platero García

1. Interface controls

Screen	Control name	Type	Text shown to the user	What it will do
Visit list	CollectionView cvVisits	CollectionView	(dynamic list of visits)	Displays every visit; tapping one opens it.
Visit list	Button btnAddVisit	Button	+ New visit	Opens the new visit form.
Visit list	Entry txtSearchClient	Entry	e.g. Distribuidora El Pilar (placeholder)	Filters the visit list by client name as the user types.
New visit form	Entry txtClientName	Entry	Label: Client name · placeholder: e.g. Distribuidora El Pilar	Captures the client's name; cannot be saved empty.
New visit form	DatePicker dtpVisitDate	DatePicker	Label: Visit date	Captures the date of the visit; defaults to today.
New visit form	Button btnSaveVisit	Button	Save visit	Creates the visit with status "Open" and returns to the visit list.
Task checklist	Entry txtTaskDescription	Entry	e.g. Replace charging port (placeholder)	Captures what the technician did.
Task checklist	Entry txtTaskMinutes	Entry (numeric)	e.g. 15 (placeholder)	Captures the estimated time in minutes.
Task checklist	CheckBox chkTaskDone	CheckBox	(shows the task description next to it)	Marks the task done/pending; recalculates status and total time.
Summary view	Button btnGenerateSummary	Button	Generate summary	Builds the plain-text service summary from the visit's tasks.

2. Microcopy inventory

Situation	Text in English	Copia en español (solo para el informe)
Empty state	No visits yet. Add your first visit to get started.	Aún no hay visitas. Agregue su primera visita para comenzar.
Validation error 1	Please enter the client's name.	Por favor ingrese el nombre del cliente.
Validation error 2	Minutes must be a whole number greater than zero.	Los minutos deben ser un número entero mayor que cero.
Delete confirmation	Delete this visit? This cannot be undone.	¿Eliminar esta visita? Esta acción no se puede deshacer.
Success message	Visit saved.	Visita guardada.
No search results	No visits match that client name.	Ninguna visita coincide con ese nombre de cliente.

3. Model classes

Class	Field	Type	What it stores	Validation rule
Visit	Id	int	Unique identifier of the visit	Assigned automatically, never edited by the user
Visit	ClientName	string	Name of the client being visited	Cannot be empty
Visit	Date	DateTime	Date the visit takes place	Defaults to today
Visit	Status	string	"Open", "In progress" or "Closed"	Calculated automatically from the tasks, never set directly by the user
Visit	Tasks	List<ServiceTask>	The tasks performed during this visit	Must contain at least one task before the visit can be closed
ServiceTask	Description	string	What the technician did	Cannot be empty
ServiceTask	Minutes	int	Estimated time spent on the task	Must be a whole number greater than zero
ServiceTask	IsDone	bool	Whether the task has been completed	Defaults to false when the task is created

4. Methods planned

Method signature (English)	What it does	Where it is called from
AddVisit(string clientName, DateTime date) : Visit	Creates a new Visit with status "Open" and adds it to the collection.	btnSaveVisit.Clicked
AddTask(Visit visit, string description, int minutes) : void	Creates a ServiceTask and adds it to the given visit's task list.	btnAddTask.Clicked
ToggleTaskDone(ServiceTask task) : void	Flips IsDone and recalculates the parent visit's status and total time.	chkTaskDone.CheckedChanged
GetVisitStatus(Visit visit) : string	Returns "Open", "In progress" or "Closed" based on the tasks' IsDone values.	Called internally after any task change
CalculateTotalMinutes(Visit visit) : int	Sums the Minutes of every task in the visit.	lblTotalTime binding
GenerateSummary(Visit visit) : string	Builds the plain-text service summary with client, date, tasks and total time.	btnGenerateSummary.Clicked

5. Problems and solutions

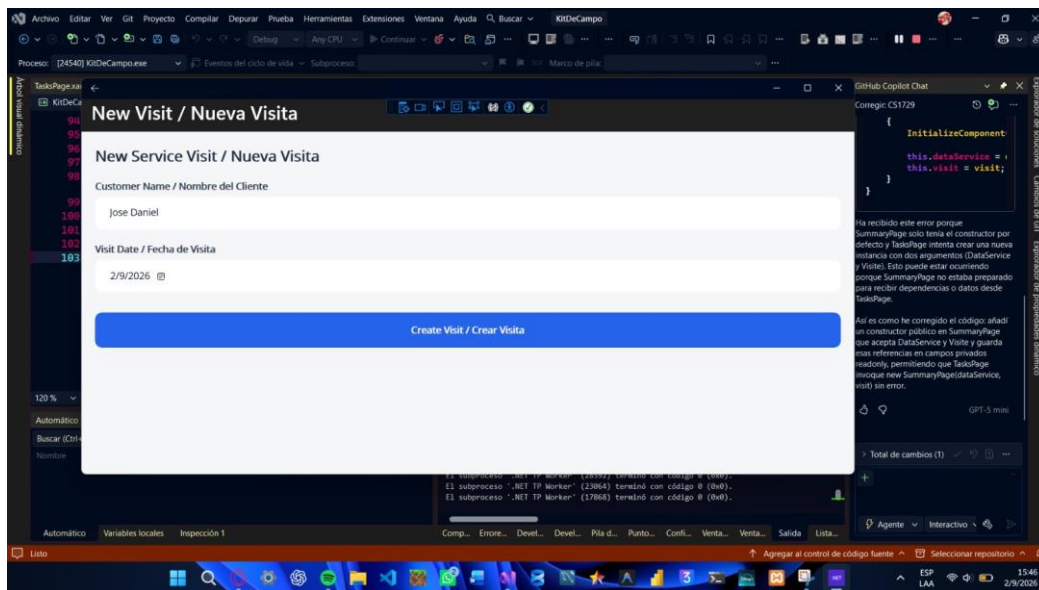

The `CollectionView` did not refresh automatically when a new visit was added, because the list was a plain `List<Visit>` instead of an `ObservableCollection<Visit>`; switching the field type fixed the binding. We also found that the `DatePicker` defaulted to 01/01/0001 the first time the form opened, so we set `MinimumDate` and an explicit default value in the constructor. Naming every control before writing any logic took longer than planned, but it made the XAML much easier to read afterward.

El `CollectionView` no se actualizaba automáticamente al agregar una visita nueva, porque la lista era un `List<Visit>` normal en lugar de un `ObservableCollection<Visit>`; cambiar el tipo de campo corrigió el enlace de datos. También encontramos que el `DatePicker` mostraba por defecto 01/01/0001 la primera vez que se abría el formulario, así que configuramos `MinimumDate` y un valor por defecto explícito en el constructor. Nombrar cada control antes de escribir la lógica tomó más tiempo del planeado, pero hizo el XAML mucho más fácil de leer después.

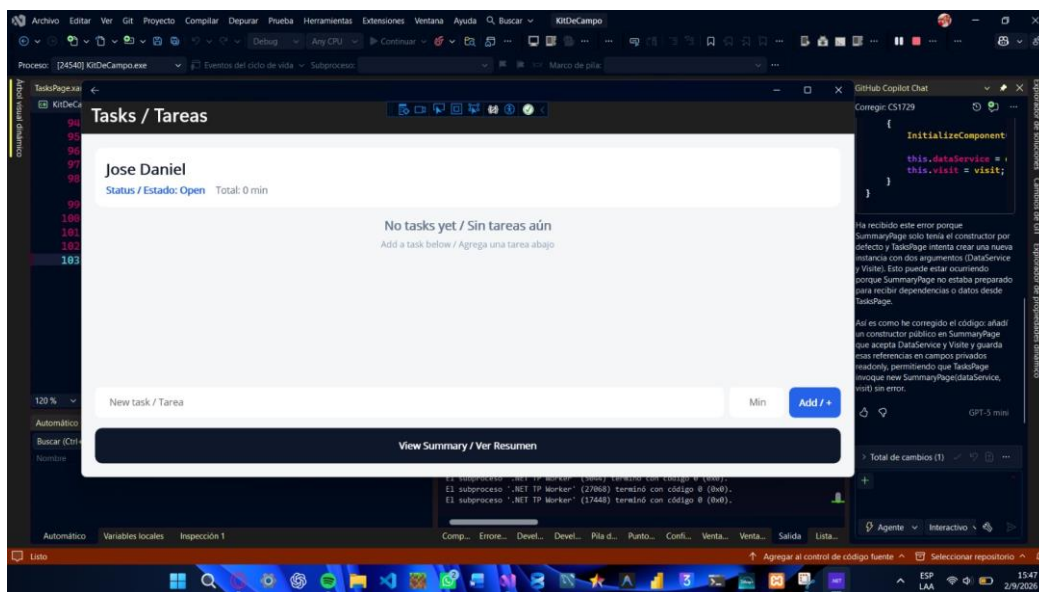

Evidence: attach screenshot EV-02 of the finished interface and paste one model class with its comments. Adjunte la captura EV-02 de la interfaz terminada y pegue una clase del modelo con sus comentarios.

Evidence — EV-02

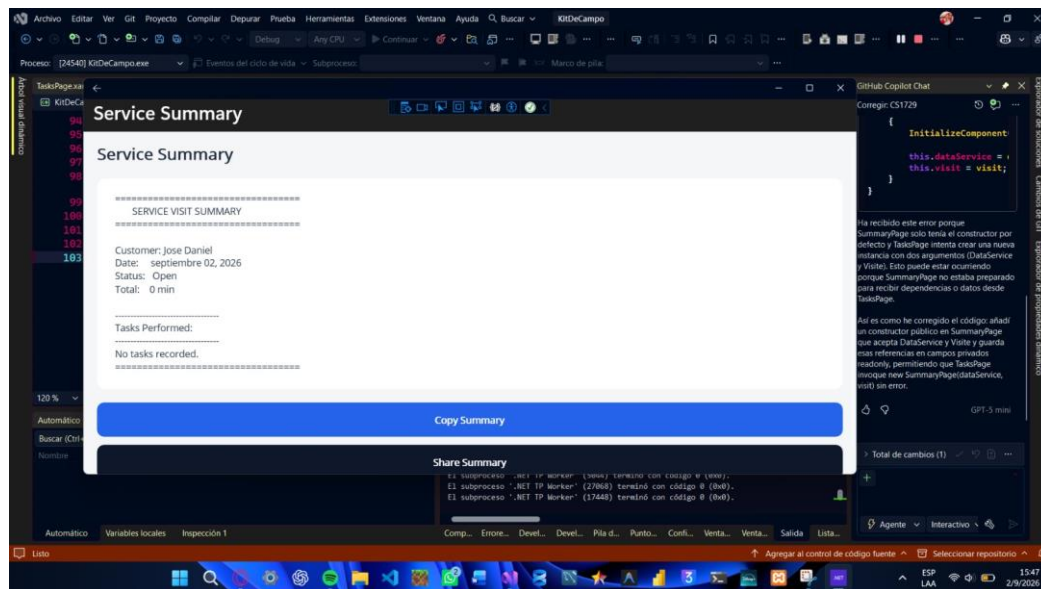

Evidencia — capturas de la interfaz terminada

EV-02a — New Visit form, running in Visual Studio (KitDeCampo.exe), with the client name and date fields filled.

EV-02b — Tasks page for the visit, showing the status "Open", total time "0 min", and the empty-state message "No tasks yet. Add a task below."

EV-02c — Service Summary screen, generating the plain-text summary with customer, date, status and total, plus Copy and Share buttons.

Signatures / Firmas

The team declares that this specification sheet reflects the real state of the interface and the model as of this date.

El equipo declara que esta hoja de especificación refleja el estado real de la interfaz y del modelo a esta fecha.
